

Avantor Clinical Services

Simplify your clinical trials with our secure biorepository and archiving services

100+
MILLION
SAMPLES
& never failed
to return one

The quality, expertise, customization, and convenience you need to advance your clinical trial objectives delivered by EPL Archives

We don't just store, we take care. Delays in clinical trials can be costly. They can reduce a drug's patent window, decreasing its long-term profitability. In addition, they can place an unwanted burden on patients. As a result, meticulous care of clinical and biological samples is critical to the validity of your research. Samples are a cornerstone of any scientific operation, representing both proof of research done and potential for discoveries to be made. It's critical that your samples are properly stored and managed, especially if they require certain cryogenic conditions or GxP regulatory compliance.

CONSOLIDATE YOUR STORAGE

For over 40 years, Avantor Clinical Services has served as the industry benchmark for the consolidation, preservation and management of regulated research and manufacturing material. With over three million cubic feet of dedicated storage space, all biorepository and archiving facilities in the U.S. and Europe are GxP compliant. Avantor Clinical Services offers the flexibility to store and actively manage biorepository requirements throughout all stages of preclinical and clinical trials.

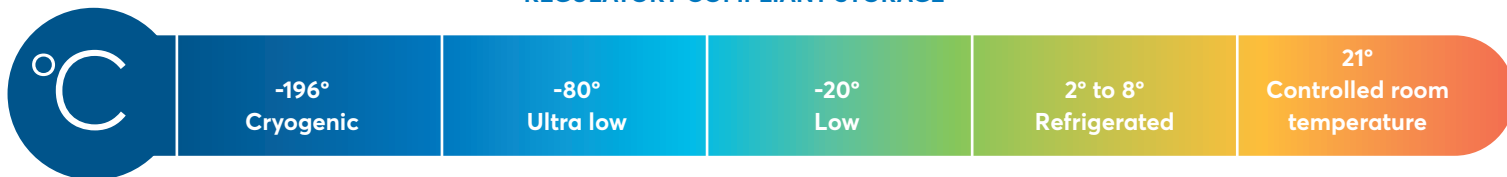

Avantor Clinical Services ensures that your cell banks, bio samples and other vital research materials, including samples, blocks, slides, test articles, paper data and electronic media are securely stored, even in the event of a power failure or a more severe disruption. Our state-of-the-art biostorage facilities are purpose-built and equipped with systems that are engineered for the strictest biorepository requirements and QA audit standards.

We have never failed to return one of the 100 million+ samples our customers have entrusted to our care

Monitored continuously with redundant backup systems

REGULATORY COMPLIANT STORAGE

From the minute we take custody of your samples, every step is tracked in real time. We carefully inspect, index then transfer the samples into qualified and monitored storage with backups and redundancies.

All our GxP compliant Standard Operating Procedures (SOPs) are governed by extensive quality-control measures to ensure regulatory compliance.

It provides secure online access to manage your complete inventory, submit work requests and generate standard or custom reports. These reports can help you support your internal and external reporting needs.

SIMPLIFY YOUR CLINICAL TRIALS

EPL Archives is a part of the Avantor Clinical Services organization, which is dedicated to assisting you in optimizing your preclinical and clinical objectives. Over 90% of the top 50 global pharma companies and 8 out of the top 10 Contract Research Organizations trust Avantor Clinical Services with their preclinical and clinical needs including custom kitting, biorepository services and equipment and ancillary services.

Through the larger Avantor Services group, we can support you with critical, operational or highly specialized tasks, so that your team has the time and ability to focus on theirs: envisioning the world's best scientific discoveries.

Contact us to get started

Gearing up for preclinical and clinical trials can be challenging. Our Clinical Services teams are ready to help with expert insight, logistical expertise and technical support.
